

**21**

each second metropolitan area outpatient, an identification of the second metropolitan area outpatient, the address of the second metropolitan area outpatient, and data representing the medical history of the second metropolitan area outpatient.

**26.** A system as defined in claim **25** wherein said first outpatient system is a skilled care facility system comprising:

at least one medical device for administering medical treatment to an outpatient at said first remote location;

at least one medical device for sensing a medical condition of an outpatient at said first remote location and generating outpatient condition data relating to said medical condition; and

means for transmitting said outpatient condition data from said first remote location to said electronic nursing station on a real-time basis.

**22**

**27.** A system as defined in claim **25** wherein said second outpatient system is located at an outpatient home.

**28.** A system as defined in claim **27** wherein said second outpatient system comprises:

at least one medical device located at said outpatient home; and

means for transmitting outpatient data from said outpatient home to said electronic nursing station on a real-time basis.

**29.** A system as defined in claim **28** wherein said means for transmitting outpatient data from said outpatient home to said electronic nursing station comprises a touch-tone telephone.
